Allowable Subject Matter

Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art discloses the use of antenna connected transceiver structures in commercial mobile radio base stations, which may include multiple transmit and receiver branches which contain isolation and filtering circuitry to obtain proper operating frequencies for communications, separate transmit and receive signals, and prevent interference. It is also known in the art to use frequency hopping as a means of communication diversity in commercial mobile radio systems. Claim 1 teaches a base station for a commercial mobile radio stations, having a detailed multi-branch structure for transmitting as well as a multi-branch structure for receiving, as well as filtering and isolation to prevent interaction of the transmit and receive networks. In combination with this detailed structure applicant also claims that each receive branch has a receive filter which passes a block of frequencies, the passband of the filter including frequencies corresponding to hopping channels which necessitates a specific filter structure. When incorporating all the limitations of the claim, none of the prior art discloses the features as claimed.

Claims 2-11 are dependent on claim 1 directly or indirectly. When incorporating all the limitations of the base claim and any intervening claims, none of the prior art discloses the features as claimed.

Claim 12 discloses a method that incorporates similar allowable limitation to claim 1, when incorporating all the limitations of the claim, none of the prior art discloses the features as claimed.

Art Unit: 2682

Claim 13 discloses a system that incorporates similar allowable limitation to claim 1, when incorporating all the limitations of the claim, none of the prior art discloses the features as claimed.

Claims 14-19 are dependent on claim 13 directly or indirectly. When incorporating all the limitations of the base claim and any intervening claims, none of the prior art discloses the features as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dekker (US 6,049,562) discloses a frequency hopping receiver which contains multiple branches, each controlled to pass a frequency hopping channel.
